Volkhovstroi and "Kirov" Aluminum Plants

6. Location: Volkhovstroi (59° 54° N. 32° 23° E)

Machinery and personnel of these installations were evacuated to an unknown destination in 1941. Suildings were severely damaged during the war.

As of March 1946, 5,000 PW's and a Special Construction and Installation Organization (OSMCH) numbering 3,500 workers and 500 specialists were engaged in the reconstruction of the plant installations under the direction of the All-Union Aluminum Construction Bureau.

According to plan, the aluminum baths were to have been in operation by 1 May 1946.

25X1

Tikhvin and Boksitogorsk Regions

7. Location: Tikhvin (59° 38° N, 33° 30° E), Boksitogorsk (approx 59° 24° N, 33° 52° E)

Tikhvin: Branch of Geological Aluminum Survey and site of several bauxite mines.

Boksitogorsk: Several bauxite mines and one small aluminum plant, which was not in operation in March 1946.

25X1

Zaporozhe Aluminum Works

8. Location: Zaporozhe, Ukraine (470 450 N, 350 110 E)

Severely damaged during the war, the plant is still under reconstruction, but as of June 1946 was in operation using foreign, principally Hungarian, bauxite,

25X1

Petsamo Region

9. Location: Petsamo

Bauxite mines

Technical personnel sent to this area from Boksitogorsk in the spring of 1946.

25X1

Serov (Nadezhdinsk) Region

10. Location: Serov (59° 40° N, 60° 40° E)

Numerous bauxite mines, the first of which was opened in 1943. Political prisoners and repatriated Soviet PW's are employed in these mines,

25X1

Aluminum Factory No. 216

11. Location: Yerevan, Armenian S.S.R (40° 11° N, 44° 30° E)

700 workers. No other information available.

CONFIDENTIAL
